

Resumen del proyecto

# HURACANES

Realizado por:

Roger Vicente Rendón Cuevas

Fabrizio Martínez Chávez

# Objetivos

Analizar en que meses a lo largo  
del año hay una mayor cantidad  
de huracanes en el Atlantico

# Técnica estadística

VIENTO

```
> mean(data$Wind)  
[1] 52.89104
```

```
> median(data$Wind)  
[1] 45
```

PRESIÓN

```
> mean(data$Pressure)  
[1] 992.2164
```

```
> median(data$Pressure)  
[1] 999
```

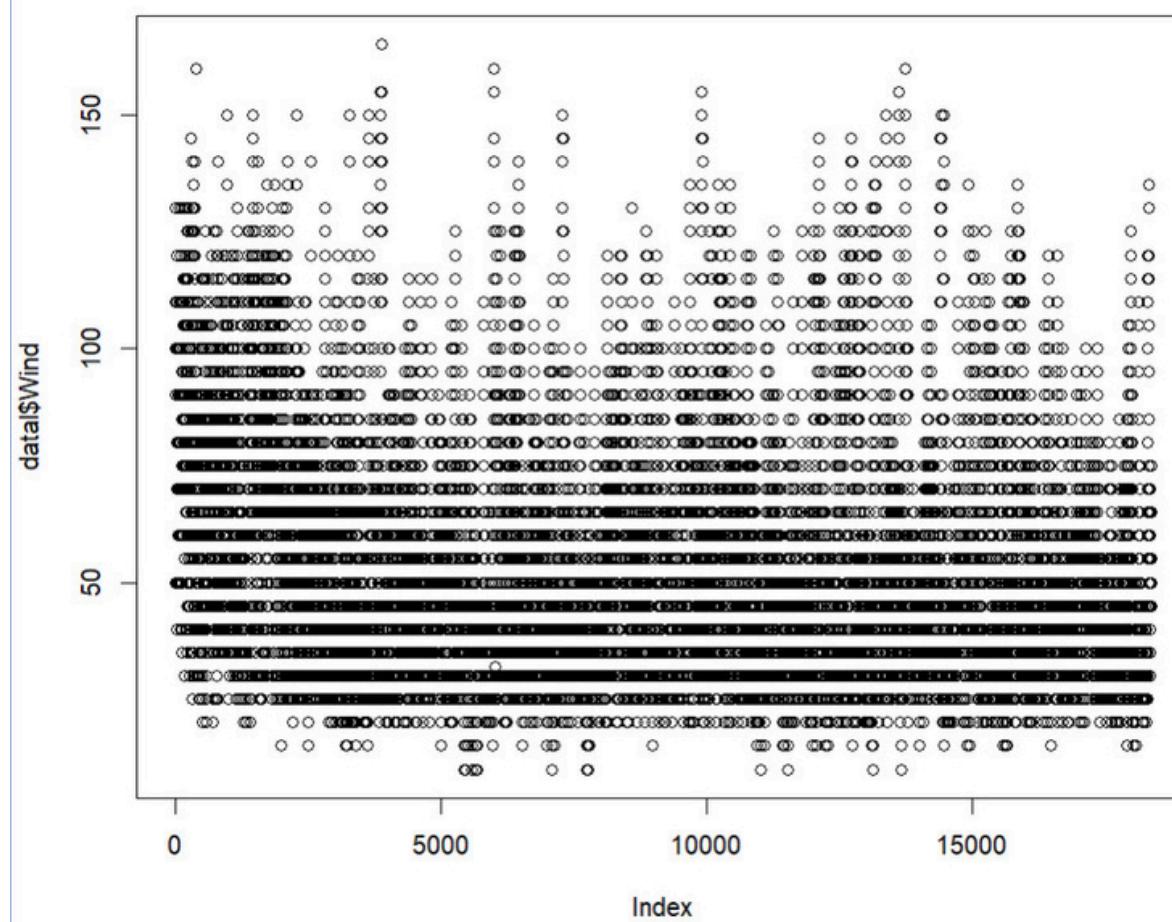

CO2

```
> mean(data1$CO2)  
[1] 23497.71
```

```
> median(data1$CO2)  
[1] 23522.98
```

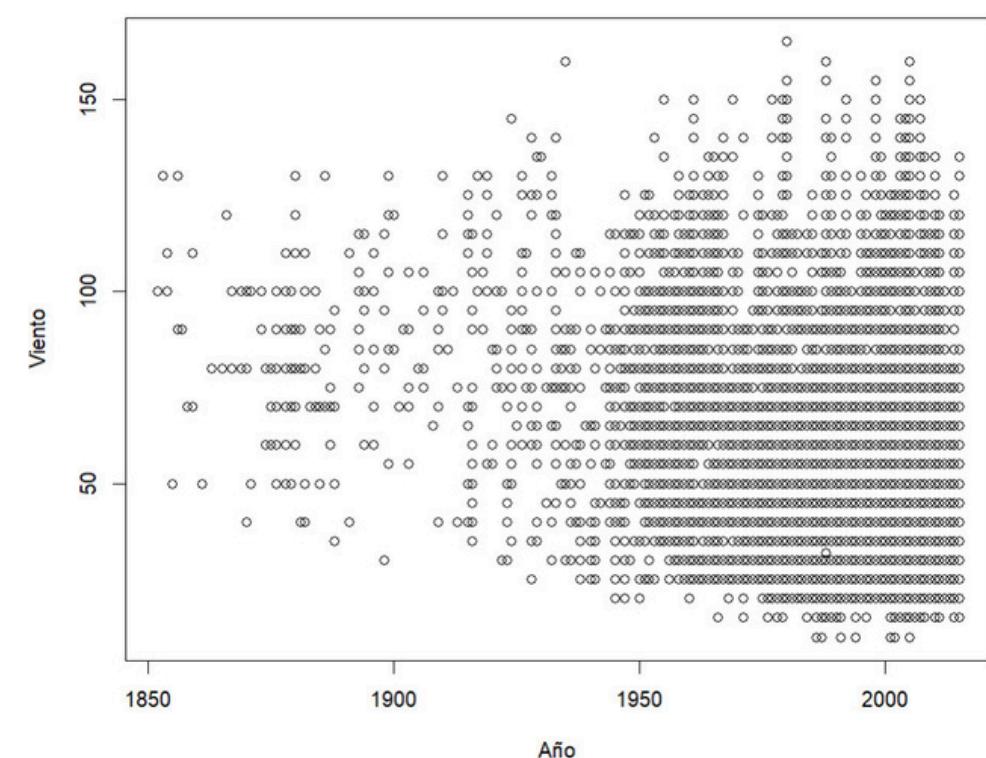

```
> summary(datav)  
   Min. 1st Qu. Median     Mean 3rd Qu.    Max.  
      10       65      998     8181    19388   35506
```
